I recall the time that changed  
My whole fucking life  
Call it fate, call it what you want,  
But it happened to me  
Some people go through life searching  
For this thing caled love  
Call it fate, call it what you want,  
But it happened to me  
And I can't believe  
The way she makes me feel inside  
When I'm around her,  
I just can't help but smile  
She may be unsuspecting of this  
But I'll look at her  
And say all of things I feel  
She wants to know all the things I feel.  
I'm gonna tell her how I fell inside  
I've won (3x)  
She makes me laugh, she makes me cry  
My love for her will never die  
She makes me think,  
She mkaes me believe in myself  
Now I can see my life is rectified  
And I can't believe how  
She changed my life  
My outlook on life is leaning  
Toard the positive  
She means everything to me  
And I'll do anything to keep  
From losing her  
Deep in my heart I can't lose her  
And I don't feel like such a loser now  
I've won (3x)
