Night time
Journey to the moon
On the back
Of a big firefly
Take us up above the city
Your hair
Picks up all the light
Tropical fish in sky
Take a ride take a ride take a ride take a
Come on
Take me for a ride
Open window's the sign
Staining blue, soaked into my cotton skin
See now tinkerbells in bloom
Leave your room for the sky
Take a ride take a ride take a ride take a ride
Nightlite glowing from the wall
Little god
Scare away, keep at bay
Elfish shadows want to fool me
Dimly, dimly lit's the road
Creatures move very slow
Coming close coming close coming close coming close
Join them underneath the fern
Lit right through from the moon
Looking down,
I don't mind if she can see me
