

Who Guess "Life In The Bloodstream"

Visit "[Life In The Bloodstream](#)" on MotoLyrics.com

You don't believe that this whole universe
Could be inside your little sister's purse
You don't believe you're just a living glob
Like Lucy, Freddy, Ricky, Frank and Bob
We're life in the bloodstream, baby
That's the natural progression
We're life in the bloodstream
I hope the little boy don't fall and skin his knee
Ain't it hard when you discover
Your energy has to leave you for another
Don't it make you wanna lay down and cry
When they tell you it's time you have to die
We're life in the bloodstream, baby
That's the natural progression
We're life in the bloodstream
I hope the little boy don't fall and skin his knee
