The pendulum swings in slow symphony with my heart  
or

Your moods, no matter how far we seem to drift we'll  
Always come back to the center and I'll always come  
back

To your arms. Let's put tonight behind us, at least until  
It happens again and we do the same thing. This  
pendulum

Sways through those sweaty summer days when we  
aren't

Allowed inside but we go in anyways, just to stay cool.  
Just to stay cool. It seems as though we drag along with  
The motions of a pendulum, back and forth, back and  
forth

And back to the center. Back to your arms. Back to how  
Things should be. Back to the way a pendulum should  
Swing, swaying ever so carefully towards the edge but  
Always coming back.
