VERSE

Thinking, leaving you was a mistake
But I try to tell myself that goodbye's the only way
It's only been 2 months, and it kills me day by day
Let's be honest, boy, I know you feel the same

PRE-CHORUS

Let's start all over, apologize and forget it,
And I don't care that you fucked up 'cuz I forgive it,
I know I cheated, you cheated, it's human nature,
But I can't imagine my life when I'm not with him

CHORUS

Nobody, gonna love you like I do
Nobody, boy, I know you miss me too
Nobody, 'cuz my heart, it's only you
So, let's just both admit it's not over, oh yeah
Baby, baby, it's not over, baby (4x)

VERSE

Tell me that you only fantasized about me
When you fucked the other girl, break it to me gently,
So I can understand you, did you forget
All the shit we've been through (things we've been
through)

PRE-CHORUS

Asking, wondering, tripping on how I'm doing
You tell your friends, goddamn, I miss her
I know you checking my status, photos, it's funny
'Cuz you write a response indirectly

CHORUS

HOOK

I don't want it to end to like this
If not as lovers, can we be friends
I don't want it to end to like this
If not as lovers, can we be friends
