### "Until We Meet Again"

Visit "[Until We Meet Again](#)" on MotoLyrics.com

I've been said time will heal all the hearting  
I know it's only your eyes I see when I close mine  
It must mean something  
And I go on and live for each moment  
Without you and smile  
Every day I miss you  
I hide it so  
I remember every thing  
The softness of your lips so perfect now  
All these angels in the end  
Know I can't replace you  
I try too hard to let this go  
It's making me wonder  
How you could just close the door  
It kills me when your love  
It's all I could ever need  
I hold you  
In my heart wrapped until we meet  
Until we meet again  
I try too hard to let this go  
It's making me wonder  
How you could just close the door  
It kills me when your love  
It's all I could ever need  
I hold you  
In my heart wrapped until we meet  
Until we meet again

Thanks to feel
