Im hanging on to a secret, how can i tell you when your so far away? Somebody save me from myself. Im trying hard just to keep it, its getting harder every breathe that i take. Somebody save me!

Stand up by yourself, don't ever let them say your nothing! You mean something to me! That's all that matters. Stand up for yourself don't ever let them see you crying, they mean nothing to me your all that matters.

Keep Kicking and Screaming

If there gonna drag you down drag me down with you  
(drag me down with you)

I swear im always gonna be around take me home with you  
(take me home with you)

There gonna try and make it hard for you, make it hard for me but they can hardly see just what you mean to me they will never succeed. Everybody got a heart to bare so don't hide it, don't hide it away down there. Stand on your own two feet and run to me.  
If there gonna drag you down drag me down with you  
(drag me down with you)

I swear im always gonna be around take me home with you  
(take me home with you)

Im hanging on to a secret how can i tell you when your so far away somebody save me from myself im trying hard just to keep it. Its getting harder every breathe that i take **SOMEBODY SAVE ME!**
