I'm pleased to meet you, I'd love to please you some  
time

(If you'd let me)

Girl if you need me then you should meet me outside  
(Cause I don't want to stay)

If I could reach you and try to see through your eyes  
(Would you let me)

Just let me show you and get to know you, in time  
(I would make you stay)

You're everything that I've been dreaming of, ooh

Hey now, girl don't you wait too late now

Your life is on the run today

But if you run forever, you won't get nowhere at all

Hey now, there's no time to waste, it's right now

Your love is gonna save the day, and if you wait forever

You won't get nothing at all

You gotta seize the day [x3]

Some day you'll have to let someone into your life

(Won't you let me)

I never felt so like I just know this is right

(So won't you come with me)

Maybe I'm crazy but this may be the right time

(Do you feel me)

I know you want to, so let me love you tonight

(Please don't walk away)

This could be everything, that you've been dreaming  
of, ooh

Hey now, girl don't you wait too late now

Your life is on the run today

But if you run forever, you won't get nowhere at all

Hey now, there's no time to waste, it's right now

Your love is gonna save the day, and if you wait forever

You won't get nothing at all

So look at the stars now  
And don't throw this night away  
This moment defines how  
Your life will be  
I can tell by the look in your eyes  
You're dying to see  
Give your heart to me  
Now hear me girl

You gotta seize the day [x4]

Hey now, girl don't you wait too late now  
Your life is on the run today  
But if you run forever, you won't get nowhere at all  
Hey now, there's no time to waste, it's right now  
Your love is gonna save the day, and if you wait forever  
You won't get nothing at all  
You gotta seize the day [x3]
