Love under fire
We stand in the flame
Now and forever
After the rain

When is forever?
You can take it from me
It may be never
C'est la vie

Love under fire
We stand in the flame, now
Now and forever
After the rain

When is forever?
You can take it from me
It may be never
Just wait and see

Oh, you can hide in the jungle
You can climb up a tree
You can scan the horizon
Tell me what do you see?

As cold as a mountain
With a heart that can freeze
There's a storm on the water
With every heart that she seas

Love under fire
Love under fire
Love under fire

Love under fire
Love under fire
Love under fire

So love under fire
And we stand in the flame
Now and forever
After the rain

When is forever?
You can take it from me
It may be never
C'est la vie

(Love under fire)
Love under fire
Love under fire
Love under fire

(Love under fire)
Love under fire
Love under fire
Love under fire

Love under fire
Love under fire
Love under fire

Love under fire
Love under fire
Love under fire

Love under fire
Love under fire
Love under fire

Love under fire
Love under fire
