

## Asia "U Bring Me Down"

Visit "[U Bring Me Down](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Don't tell me what you are  
Don't tell me what you're after  
Don't tell me what you want  
Don't tell me what you need

Aren't you just the one to always point the finger?  
I don't care for you 'cos you don't care for me

Bring me down  
Bring me down

I could breathe, I could fly  
The day before you came  
Think you own my skin now  
Break the chains, free the slave  
Turn the tides against you

Talking to the sky you promise evolution  
Progression of the mind by selling of the soul  
The last will be the first in the dust of revolution  
Someone cares for me but no one cares for you

Bring me down  
Bring me down

U bring me down, you're giving me no hope  
(Bring me down)  
Sucking off our land, blowing off the smoke  
Virus in the veins that run into the sea  
Poisoning the world with your generosity

U bring me down, you're killing me with lies  
(Bring me down)  
You take away our ears won't take away my eyes  
The red, red sea will return into the vein

Will I breathe? Will I see?  
Far beneath the clearest stream  
To the deepest ocean  
Break the chains, free the slaves  
Give back the blood, that you claim from this world now

U bring me down, you're giving me no hope  
(Bring me down)  
Sucking off our land, blowing off the smoke  
Virus in the veins that run into the sea  
Poisoning the world with your generosity

U bring me down, you're killing me with lies  
(Bring me down)  
You take away our ears won't take away my eyes  
The red, red sea will return into the vein  
Covering the world, are you happy with your gain?

U bring me down, you're giving me no hope  
(Bring me down)  
Sucking off our land, blowing off the smoke  
Virus in the veins that run into the sea  
Poisoning the world with your generosity

U bring me down, you're killing me with lies  
(Bring me down)  
You take away our ears won't take away my eyes  
The red, red sea will return into the vein  
Covering the world, are you happy with your gain?

U bring me down, you're giving me no hope  
(Bring me down)  
Sucking off our land, blowing off the smoke  
Virus in the veins that run into the sea  
Poisoning the world with your generosity

U bring me down, you're killing me with lies  
(Bring me down)  
You take away our ears won't take away my eyes  
The red, red sea will return into the vein  
Covering the world, are you happy with your gain?
