They are able to simulate the exact brain patterns  
The grey world of reality

Euphoria

Random joy  
Expensive toy  
You captivate my mind  
I never answer telephones  
Don't like to leave my screen alone

Euphoria

Floating through this fatal bliss  
I have no time to think  
Don't wanna wake up in the world  
out of focus fading in

Dilated pupil rem  
I freeze a single frame  
From the life I used to lead  
Before altered reality
