[Verse 1]

Are you aware, of how much you complicate me?  
And are you aware? Your words suffocate me.  
And don't deny, you're talking behind my back to your  
friends  
And don't deny, one day you'll need me, need me.

[Chorus]

All my life I've been looking for the answers,  
to the questions you never asked.  
And we never planned on this disaster.  
When will I let it go?

So incomplete, your stare is cold unlike anything I've  
ever seen.  
so incomplete, my body is tired and falling apart at the  
seams.  
I won't deny, I took no part in ever wanting you back.  
And don't deny, one day you'll need me, need me.

[Chorus]

All my life I've been looking for the answers,  
to the questions you never asked.  
And we never planned on this disaster.  
When will I let it go?

[x2]

If it's tonight, please let me know.  
If it's tonight, why don't you let me know.

[Chorus]

All my life I've been looking for the answers,  
to the questions you never asked.  
And we never planned on this disaster.  
When will I let it go?

[x3]
