[Defari]

Behold my life, the life that I live is just one  
My reflection is God, my shine is the sun  
My sign is Aquarius, rap styles I got various  
I'm a product of a pops who had bullshit marriages  
My girl she's a G 'cause she carried her  
My baby girl Vicky, please believe I'ma marry her  
Fill her pockets with fifties and hundreds  
I'll look back, say I done it, I did it  
Man I've traveled the seven seas and stayed spank  
fitted  
Shit, the bank did it, my dank stay stank scented  
(Doja, make squares lose composure)  
Behold my life, the life that I live is just mine  
The days of our lives change in space and time  
I break bread with the Hennessy, won't drink with the  
enemy  
Cash foreign money at LAX from Italy  
(Hey yo bartender, let me get another Hennessy)...  
Behold my life, a DJ since '83  
"Eric B is President" made me wanna MC  
Made me wanna be the D to the E  
Crowned 310 King, of Los Angeles City  
Behold my life, registered guns and Rambo knives  
The funds come in hundreds and ones, I hold on tight  
And take the weather however it comes, the sun still  
shine  
The black man said, uplift your mind  
Take a page from history and turn it into facts  
Bush is back, watch out for the new crack  
The streets already hot like in the '80s  
And they don't give a fuck how we choose to raise our  
babies  
So this the days of my life in L.A.  
I look at the sunset, light a blunt and say  
Behold my life... {"the greatest story ever told in  
rhyme" - Prodigy}  
The life that I live is just one  
(My life, my life, my life, my life)

[Iriscience]

Behold my life, I kneel down and roll my dice  
I told cats I work angles so precise  
I got on to build, I don't meddle in wars  
But I'm all out for sure if they threaten my shores  
Bet, family and crew toastin' dark brew  
Took time to develop my pictures in darkrooms  
Babs, drop the needle, pick up a harpoon  
Dip it and tattoo 'em like Mr. Cartoon  
Globe Trotter, international spot rocker  
In Europe they bring hash soon as they spot Rakaa  
Iriscience, a champion hotboxer  
Crescent Heights 'D', number one shot blocker  
They get scared when I blow my mic  
Now prepare for a cat that'll fight for rights  
Behold my life... (My life, my life, my life, my life)

[Evidence]

Behold my life, a pale horse and mic device  
Up the price, the time is right for shows at night  
Peace to The Roots that chop "Clones"  
Dilated Live in Vegas, Defari and Tom Jones  
Slap bones, lay tones to reels  
Stay blown and in a zone with our own appeal  
Turn that shit up, in cars or headphones to fill  
Drop back, we go long and throw the pill  
Fuck the overkill but understand the deal  
Politics took over rap for real  
But still we out for top bill and coppin' a mill'  
If I fall short, got friends and options to chill  
Dilated blaze the mic device  
And I'm blessed, my whole crew spit as cold as ice  
Behold my life... (My life, my life, my life, my life)
