The carcinogen city is in your vicinity.  
The carcinogen city is in your destiny.  
The punch line is that I am in your city.  
Swallow the gasoline additive, digest the MTBE.  
You will always remember your placement when they  
make this discovery.  
Swallow the gasoline additive; digest the MTBE.  
This is my part in biological inevitability.  
Conceive your death certificate out of your faucet and  
become sustenance for the insects.  
Baby keep your eye on the water supplies, because my  
combat gear is a cup and a half of cyanide.
