Chorus: When we are one physics fall apart (repeat four times)

They say there's no God. They're wrong.

They'll know in not too long.

Verse: Physics fall apart in time.

Lines by human minds combine

Torus creating divine;

Excersizing my mind.

(Repeat chorus)

Verse: We are computers programmed by the creator precise.

To think we know all's crazy by our perceptions limit.

Outro: We can't know all there isn't.

We can't see past human vision

For our membrane's programmed limit

Can't go past what's not our business.

When? When will I wake up (never will I)

From this life that I'm dreaming up? (never will I wake up)

I can't know all the answers

Nor follow and trust anothers.

Blind are becomming my two eyes

As my third one opens they critisize

As I go crazy. What can I do?

Now you're just illusion so I'm

Through with you. (wake up)
