Measure for measure

Your love's so much pleasure.

Like a haunting melody,

You came inside and captured me.

And I so happy, you're the rhythm of my rhyme.

You and i together, we'll stand the test of time.

You know how to love me,

You know how to make it right (so nice)

You know how to love me ,

Sweet as the morning light.

Sooner or later, I Knew you'd come my way.

You're welcome my love just promise that you'll stay.

You know how to love, right

in a special way.

You know how to love me, tonight,

and I wanna say.

You know how to love me

You're the real that I feel never go away.

Seeing's believing, don't you know you're the dream
come true.

Ain't nothing deceiving 'bout the way that I'm loving
you.

You know how to love me,

You know how to make it right, (so nice)

You know how to love me,

Sweet as the morning light.

Nothing's forever

That's what people say.

And each time we're here together

Forever and a day.

(chorus
