I just want you to remember me x10

How I was good
Remember those place (you took me to)
You had done for me
You had to lie to remember those thing you put me
through
It seem you can't remember
You just forget about me
When I try to hold your hand (you pull away) I said try
with you
Just remember me
I come back
Remember me, remember me baby

I'm the one
You said you stick for up for me remember me
Ooh well, you can't
Now you want to remember me babe

Chorus
Remember, remember remember me I just say
Remember remember remember me I just say baby
that what you need to do x5
