Girl i know what your thinking
Keep some answers in your heart

Tonight girl im hear to make it different
Is the presure sweeten up your life

Let your hair down let your guard down
Let me show you everything you been

Missing let it all go girl u gotta let it flow
Don't let the door close i know i can get u

Better u need some suger ur only
Human baby let me bring it on to u tonight

I need your suger im gonna make it easy
Smooth it out an make it feel so right

Girl love doesn't have to be i mean i
Feel for u time and again girl take a look

At the good at the big picture
Thare is a

New star im in my head let your hair down
Let your guard down let me show

U every thing u've been missing let it all
Go gurl u gotta let flow don't let the door

Close i know i can get u better u need
Some sugar ur only human baby let me bring

It on to u tonight i need your sugar im gonna
Make it easy smooth it out and make
Feel so right
