Verse 1

... softly through the air
Angels stars surround me
Seems like it's been forever
Think I just need a moment
Sorry I need reminding

I never been so... trying please don't leave me behind
We've become what we never wanted just like water
and fire

Verse 2

... Softly beneath, I ignore all the edges aside me
Holding myself so still, don't even feel the...
You suddently start believing

... Nothing to see is mine. We always do what we never
need to
The worlds we built they fire

We'll fall down down down
We'll go down down down
We'll fall down down
We'll go down down

(Repeat 5x)
