Over and Over
La la-la la la-la la-la
Alicia Key, Keyshia Cole
It's the way it is
Baby I remember one time when we were so secure
But now it's like December when you say that I'm so
insecure
And I gotta get away cos you're making me weak it's
keeping me trapped
I gotta be a fool for sitting here trying to get that old
thing back

You're used to no work with someone who always did
what you say
You're used talking to someone with something ?? to
say

You don't even try no more
You don't even care no more

I don't wanna love you
Don't wanna need you
Just wanna leave you
(I swear)
I just want it to be over (I just want it to be over)
I just want it to be over

It's like I hate to love ya
A charade we play time after time (time after time)
It's like you love to see me confused and a mess
I'm losing my mind (I'm losing my mind)

I gotta get away cos you're making me weak it's
keeping me trapped
I gotta be a fool for sitting here trying to get that old
thing back

You're used to no work with someone who always did
what you say
You're used talking to someone with something ?? to
say

You don't even try no more
Why you don't care no more?

(CHORUS)

I don't wanna love you
Don't wanna need you
Just wanna leave you
(I swear)
I just want it to be over (I just want it to be over)
I just want it to be over

La la-la la la-la la-la
La la-la la la-la la-la
You know I don't wanna hear it no more
La la-la la la-la la-la
Oh the lights

You're used to no work with someone who always did
what you say
You're used talking to someone with something ?? to
say

You don't even try no more
Why you don't care no more?

(CHORUS)

I don't wanna love you
Don't wanna need you
Just wanna leave you
(I swear)
I just want it to be over (I just want it to be over)
I just want it to be over

(CHORUS)

I don't wanna love you
Don't wanna need you
Just wanna leave you
(I swear)
I just want it to be over (I just want it to be over)
I just want it to be over

Cant it be over?
Over and over
