Now that you're coming to me  
I open my eyes just to see  
All of my thoughts going free  
A reason enough for to be  
chorus:Hear you  
When you barely just breath in next to my ears  
You're whispering the magic words  
See you  
When you barely just step in next to my eyes  
Searching on my soul  
It's all but a craft all the way  
Compel and burn out then I lay  
Whay else is now left to say?  
Follow the night  
Follow your light  
Forgetting that:  
Sometimes you are not here with me  
I often need you  
And you're not around  
I'm so fucked up  
And I need you more  
Don't you ever let me down  
chorus:  
This is all I can fell
