This is the end of for all the chapter... of my life
And I hope story is over no one know

Disire sky now bleeding
Put this all memory but I can't left biting
(And let go)
This I can gone but can't left
This fairytail is same still with the loneliness

Reff:
I stay with you
With every single words I say
I never go
We have spend OUR LAST TOGETHER
And when you turn back to me
You straight to never leave forget
Coz I can't stop
To make you live with me forever
(When now to spend our last together)
(I want to live with you forever)

Are you realy here from me
You never felt so long
All the sign could that I have
(Think that twice)
Every chance of for your less... promises...
You never let me go...
