Just look up and imagine you can fly  
Far above the sky, do you see the sun?  
Blasting at your eyes, just fly further above  
There is no place to hide you should realize  
There is no place to hide anymore

Go out on your own  
(You) can't do this alone  
Maybe you'll learn  
(When) you start to turn away from me

Living dreams and taking life  
It's all about this you should realize  
No turning back and no falling down  
The strength I have I will show you know  
Take me on! Do you have the strength?  
Take me on! I will make you disappear!

Go out on your own  
(You) can't do this alone  
Maybe you'll learn  
(When) you start to turn away from me

Just reach a littler higher, you'll survive cause we won't  
let you fall  
We won't let you fall

Use your chance  
It's always one chance to take it all  
Do something and stop waiting for more

It's always one chance to take it all  
Do something and stop waiting for more

Just reach a littler higher, you'll survive cause we won't  
let you fall, you fall (x2)
