I live my love alone  
I don't hide it  
So far I've ever known is to be fire,  
that the water can't quell  
Now everything you told  
You can't hide it  
Now everybody's gonna take you higher  
then the truth is revealed

You are the one  
You're the new star  
Under my sun  
Second to none  
You're the true star  
Under my sun  
There is no way I will let  
this moment pass me by  
Listen to me now  
Set yourself free now  
You are the one  
You're the one star  
Under my sun

I live my love alone  
I don't hide it  
So far I've ever known is to be fire  
That the water can't quell  
You're in the danger zone  
You can't hide it  
so let your body try to take you higher  
let your dreams become real

You are the one  
You're the new star under my sun  
Second to none  
You're the true star  
Under my sun  
There is no way I will  
let this moment pass me by  
Listen to me now  
Set yourself free now

You are the one  
You're the new star  
You are the one  
You're the one star  
You are the one  
You're the new star  
Under my sun  
Second to none  
You're the true star  
Under my sun  
There is no way I will  
let this moment pass me by  
Listen to me now  
Set yourself free now  
You are the one

You're the one star  
Under my sun (so let your body try to take you higher  
let your dreams become real)  
You're the one star under my sun  
(So let your body take you higher, let your dreams  
become real
