I was alone

Until you came and brought the sunshine

I was afraid

But in your love I found peace of mind

I was so blind

You opened my eyes and now I can see

I know that you understand me baby

You're all a woman should

And it's you baby

That gets me to tommorrow

And it's you baby

That takes away my sorrow

When you lie close to me in my heart I believe

We'll always be together

And there aint nobody better

Our love will last forever

I finally found

*\*chorus\**

Someone to hold

Girl you're my everything

To call my own

Every single day of my life  
I'm not alone  
You take me and make me whole again  
Whenever you smile  
Baby my world is filled with laughter  
I look in your eyes  
And baby my heart and soul are captured  
With the touch of your hand  
You start a fire burning  
And there'll never be another  
Now that we've got each other  
\*chorus\*  
Oh, girl  
You make my life seem brighter  
Cuz you take me  
And lift me  
Up higher  
Your loving feels so right  
Takes my breath away  
Everytime you say  
You'll love me for the rest of your life  
\*chorus
