# "Heliopolis By Night"

One day I was sleeping and I was taken high
Through the veil of darkness that is stretched across
the sky
And though I could see nothing I heard a voice say this:
"Interflight coordinates for Heliopolis"

Beautiful unusual sight
Heliopolis by night
Bathed in gold and shimmering light
Heliopolis by night

Sent me for the first time to the place they call their
home
Words could not describe to you the things that I was
shown
And though I was so far away not one thing did I miss
Safe among my friends in golden Heliopolis

(Danced all night)

Beautiful unusual sight
Heliopolis by night
Bathed in gold and shimmering light
Heliopolis by night

Beautiful unusual sight
Helioplis by night
Everything will be alright
Helioplis by night

And the reason why they took me is something I never
learned
My body lay there sleeping when I finally returned
And the lover who I left behind woke me with a kiss
And asked where I had been; I answered, "Heliopolis"
