Impulses through my brain  
Reaching text and through my veins  
Why should you take me from  
The rights of lieing, over come  
Never to see your face again  
Where should I start our end?

(Chorus:  
Don't try to bring me into your world  
Don't try it anymore  
I'm not your little child again  
Not your little boy! )

You try to control me  
But can't even control yourself  
Your lectures and your shit  
Your the one who'll need the help  
You don't undertstand me  
You keep inturupting

Just get out of my way, and get the fuck outta my sight!

(Chorus x2)
