

## Abortus "Abort Us"

Visit "[Abort Us](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Did we offend you, good don't understand it good  
Did we upset your way of thinking like we knew it would  
Your mind can't cope with this thin skin in deep it sinks  
Offending breeding fear confused our name how hard  
it hits  
Your life must have a void complaints a story told  
Disbelieving all your senses because of the name we  
chose  
What a response you gave awake at night you lay  
You poor pathetic sack of shit the bait you'll always take  
Did we upset you good won't understand it good  
Did we just fuck your narrow mind blowing on your  
"ideals"  
You just can't cope with this too hard just to dismiss  
Still offending breeding fear our name in you it sits

Your life does have a void gossip our story told  
The disbelief at all your senses on you it does unfold  
What a response you gave awake at night you lay  
You whining sorry sack of shit the bait you always take.

[Chorus x2]

Nothing to do with the surgeon's knife  
Infact it's just the opposite  
If you don't like us abort us from your mind  
Is all we have to say

Watching your life fall apart  
Resistance is futile you learn in time  
Fills the space in your empty mind  
Abortus the name that draws the line  
It fills the space in your empty mind

[Lead Gooch]

[Chorus x2]
