Music was my first love

And it will be my last

Music of the future

And music of the past

To live without my music

Would be impossible to do

In this world of troubles

My music pulls me through

Music was my first love

And it will be my last

Music of the future

And music of the past (3x)

Music was my first love

And it will be my last

Music of the future

And music of the past

To live without my music

Would be impossible to do

'Cuz in this world of troubles

My music pulls me through
