

Above & Beyond "Far From in Love"

Visit "[Far From in Love](#)" on MotoLyrics.com

I can see behind your eyes that you're afraid of who
you are

Only silence now between us
I'm amazed we've come this far

Far from in love
Far from in love

Like a fire burned to embers
I know this is where it ends
In the ashes we are dying
Almost strangers only friends

Far from in love
Far from in love
Far from in love
Far from in love

Far from in love (so far from in love)
Far from in love (you know I don't know how it came so
far)
Far from in love (far away from the love that we had)
Far from in love (from all the loving we that knew)
(now I miss your touch)

Far from in love (fading away from me like melting
snow in my hair)
(I miss your touch)
Far from in love (trying to sew up the love that was built
on the sand)
(I miss you so much)
