Uh!

Since the time when angels cried  
A man showed up  
With a blade of glory, and a shield of gold  
He never felt this before  
A storm was raging, not 'til now  
We knew it'd be a loss

But from now, happiness will shine  
On us

Come alive, out in the dark  
Come alive, follow your heart  
Come alive, this is our last coming down

We found the star, that shines so bright  
The gods, has send us a sign  
When steel meets steel, an oath will pride

And fire  
Will burn from the ground

Come alive, out in the dark  
Come alive, follow your heart  
Come alive, this is our last coming down

Come alive

(Solo)

Come alive, out in the dark  
Come alive, follow your heart  
Come alive, this is our last coming down

Come alive x
