Gotta break it on down x8

Verse1

Just after midnight
Height of the night life
Dark lips and dark eyes
I'll meet you outside
Now...
We bout to break it down
Feel the heat risin
Hear the beat drivin
Sweat drippin off your skin
Don't try to fight it
Now
We bout to break it down

Chorus

Go hard
Till the sun comes up
Underneath the stars
You can fall in love
Oh oh!

Go hard
Till the sun comes up
Underneath the stars
You can fall in love
Oh oh!

Embrace the rapture
Eternal summer
Life is a puzzle baby
We got your answer
Now
You gotta break it down
Under the Red sun
Ignite your passion
Pulse is the rhythm
Laws of attraction
Now
You gotta break it down

Chorus
Go hard
Till the sun comes up
Underneath the stars
You can fall in love
Oh oh!

Go hard
Till the sun comes up
Underneath the stars
You can fall in love
Oh oh!

Somebody say pull up!

Rap

Rise, rising tide, high, hotter than the median line.
Bright like a diamond, look how we shine, shine.
You could get lost In the sky, (break it down)
Count the stars... promise you light years will pass,
You be counting' Infinity and beyond
Cross My Heart... feel the adrenaline running through
ya body like formula 1
Hyperdrive, come into my world, it'll be alright
Let the time fly in my arms tonight
I can see the sunrise in your eyes(in ur eyes)
When you enter the centre of forever there aint no
place better.
Take a walk on the wild side or do whatever
Never met a specimen better than all the rest of em'
Best of emm
Guaranteed u won't ever forget her.

Chorus
Go hard
Till the sun comes up
Underneath the stars
You can fall in love
Oh oh!

Go hard
Till the sun comes up
Underneath the stars
You can fall in love
Oh oh!
