The future love sounds are ringing through the air
Shapes on the dancefloor, the beat that drove us there
The music pumping to keep our hearts in time
The dancefloor empties but leaves your hand in mine

In the darkest night you are a blinding light
To say you are mine, to say you
All I want is to say you are, to say you are

The future love sounds are ringing through the air
The past and present reverberating clear
The streets, the dancefloor, the stars are only light
Your hand in my hand to guide you through the night

This love is waiting for you
This love is waiting
You know it's waiting for you, for you
You know I'm always waiting

The future love sounds are ringing through the air
Shapes on the dancefloor, the beat that drove us there
All I want is your hand in my hand
To guide you through the night

This love is waiting for you
This love is waiting
You know it's waiting for you, for you
You know I'm always waiting

I'm always waiting

The future love sounds are ringing through the air
Shapes on the dancefloor, the beat that drove us there
The future love sounds are ringing through the air
For you, for you
You know I'm always waiting

The future love sounds are ringing through the air
The past and present reverberating clear
The future love sounds are ringing through the air
For you, for you
You know I'm always waiting
