I am all that a man can be
muscle, bone insecurity
I reassess the reference points I use
Some of them are modest, some are huge.
If you ask my lovers what I am-
they would tell you I am a complex man
I rendezvous with women who agree to promenade my
passion, and let me be.
Cool water and cold disdain keep me standing sturdy
and strait
I know I could have been something more
but it strikes me as a bore this (?)

Im a man with a (?) fuse.
Deep pessimism and a love of fear
I quantify the qualities I prize
reassess your meanings and meet your eyes
Cool water and cold mistakes
keep me standing sturdy and strait
I know I could have been something more
but strikes me as a bore
this mistake

Cool water and clean cocaine
keep me standing sturdy and strait
I know I could have been something more
but it strikes me as a bore this (?)

Strikes me as a little too late.
