Sunny dancing days are stepping out of hiding
Taking me along the way I know Iâ€™m flying
Out rhythm out of time, it seems alright
How do I know what to do when there are no rules?

Chorus

Hear in here cries a voice inside.
I tell you what to do and how to live your life
The changes will make you, you
and make you go where youâ€™re going to
its all up to you

Over here over there
people running everywhere
Only trouble is theyâ€™re there they donâ€™t know where
In out all around first youâ€™re up then down
Whatchaâ€™ gonna do when all you got left you

Chorus

Hear in here cries a voice inside
I tell you what to do and how to live your life
The changes will make you, you
and make you go where youâ€™re going to
its all up to you

Solo

Idle conversation making love raising love
speaks of revelation from way above
All this senseless hassles keeping us from love
Who is he who is she probably some one I could be

Chorus

Hear in here cries a voice inside
I tell you what to do and how to live your life
The changes will make you, you
and make you go where youâ€™re going to
its all up to you

Bam ba da (repeat and fade)
