"Leave The World Behind"

Visit "[Leave The World Behind](#)" on MotoLyrics.com

People, can you hear me?
Here's a message that i'm sending now
I've got the answer to all your problems.
And tonight i'll be singing it loud.
Just surrender yourself to the rythm.
With your hands up in the sky.
Feel the energy deep inside your system.
And leave this world behind

And leave the world behind you x3
And leave this world behind
Leave the world behind you

Leave the world behind you x3
You've got to leave this world behind

People can you hear me?
Here's a message that i'm sending now.
Just surrender yourself to the rythm
With your hands up in the sky
Feel the energy deep inside your system
And leave this world behind

Leave this world behind
And leave the world behind you x3
And leave this world behind

And leave the world behind you x3
And leave this world behind
