Started out at school  
Always saying she wasn't good enough  
Rumours spread and stories told  
That she somehow heard of

Then the social network came  
And it got so much badder  
Telling her to just give up  
So she listened to the chatter

How do you feel now she's gone  
And her family is torn  
How do you feel now  
She's watching you live on

How do you feel now she's gone  
And what your words have done  
You can try you can cry you can scream  
But you're not innocent

Started out with the razor  
When she was shaving her legs  
Then it got to a knife when  
She wasn't with her parents

Always wearing jumpers and bangles  
To cover up the suicide attempts  
And then they pushed her too hard  
And she walked over the edge

How do you feel now she's gone  
And her family is torn  
How do you feel now  
She's watching you live on

How do you feel now she's gone  
And what your words have done  
You can try you can cry you can scream  
But you're not innocent

Maybe next time

You won't let it get that far  
You'll shut your mouth coz  
You know what the consequences are

There's blood on your hands  
I hope you realise now  
You killed her yourself  
I hope you've figured that out

How do you feel now she's gone  
And her family is torn  
How do you feel now  
She's watching you live on

How do you feel now she's gone  
And what your words have done  
You can try you can cry you can scream  
But you're not innocent

It's too late, it's too late  
It's too late, it's too late  
It's too late, it's too late  
It's too late, it's too late
