Fat lip hands on your hips ready to quit
The world kicks you while your down
A sucker punch was too much not getting up
You just lay there on the ground

(Chorus)

Cowboys never do it that way
When they fall they get back up in the saddle
They always own up to their mistakes
They never back down they fight their own battles
You could just forget it ride off alone and headed
Into the sunset at the end of the day
But cowboys never do it that way yay yay yay

You tell yourself try something else the hand that
youÂ're dealt
You fold face down on the table
Just pretend that you win begin again baby
If you think youÂ're able

(Repeat chorus)

You could just forget it ride off alone and headed
Into the sunset at the end of the day
But cowboys never do it that way
When they fall they get back in the saddle
They always own up to their mistakes
They never back down they fight their own battles
Cowboys never do it that way
No second guessing yeah they trust their own senses
Cowboys never do it that way
