Heavy thoughts in the dark  
Hell on earth for the man without a heart  
Suicide worth a try; let the sky fall down  
All alone forever lost like the stranded  
On the shore where specters cry

[Chorus:]

Evil spirits fly, you can't hold on  
There's nowhere to hide  
When evil spirits fly above us all  
Forever and ever, forever and ever more

What is life, what is lust?  
If you're stuck inside a world you cannot trust  
Exorcised by the words from your poisoned mind  
In the torture of the night, ask the angels  
For the road to peace

[Chorus:]

Evil spirits fly, you can't hold on  
There's nowhere to hide  
When evil spirits fly above us all  
Forever and ever, forever and ever more

[Solo]

All alone forever lost like the stranded  
On the shore where specters cry  
Evil, oh so evil

[Chorus:]

Evil spirits fly, you can't hold on  
There's nowhere to hide  
When evil spirits fly above us all  
Forever and ever, forever and ever more

And we all must die, we all must die  
Evil spirits fly
