Everybody in this town is  
Falling apart  
Sensational demands and  
Trouble with the heart  
Look at what love has done

And I'm still singing after  
Everybody's gone  
I can already smell the acid  
On my microphone  
Look at what love has done  
Look at what love has done

The stars are not needed now  
To turn out everyone  
Back up the moon  
And shoot out the sun

Look at what love has done  
Just look at what love has done

I have this feeling that it's  
Later than it seems  
That I'm trying to put my memory  
Back into dreams  
Look at what love has done

And I don't want to be another fool  
Craving for affection  
In everybody's teardrops I can still see  
My own reflection  
Look at what love has done  
Just look at what love has done

There's always someone to step on  
So you can rise a little higher  
Go ahead, ignore all the warnings  
While you lose your fire  
And look at what love has done

Just look at what love has done

Look at what love has done

Look at what love has done

Just look at what love has done

There stars are not needed now

To turn out everyone

Back up the moon

And shoot out the sun

Look at what love has done

Look at what love has done

Just look at what love has done

Look at what love has done

Look at what love has done

The past beats inside me

Like a second heart

And I (?)

Watching these things fall apart
