

Ador Dorath "Egoistic Empathy"

Visit "[Egoistic Empathy](#)" on MotoLyrics.com

We faith in unlimited progress of mankind
Renaissanced mind on the treshold of modern period
Fruits of our deeds hit while adopting
Independent will demanding understanding
The closer to human values, the more doubtful
progress seems to be...

Rise and decline progress and regression

Not only progress and regress
An abysm of impasivity
The maze of absurdity
Helplessness and insanity

What is The Deepest? What is The Real?
We are anxious to break through our limits!

We inherit everything and we inherit nothing
Every one of us starts from the beginning
Human artifacts facilitate realizing
Make it possible - but not replace

Possibility doesn't replace, no mistake...

Gliding on the low and the high waves
Their heights implicate each other
This is how the purpose goes
The way to destination is soaked in blood and sweat

Rise and decline progress or regression

Explosion of nihilism inside of protest against itself
Frustrated just like prisoners in cells
Observed and pursued
At the fun house of databases
Our World is situated
