Pure disease, a chasm of souls  
Parasites of endless things, in divinity's well  
Infected with curses, the flames of God  
Imperial races, chaos enthroned

Marvels like snails  
A wheel of depression  
Dehumanizing the shaded breed  
To zero and one

Generators of plague, never ending mind control  
Diagramming the spheres of the seashell  
In the source of all evil, the ultimate devastation  
A torrent of existence

Chaos enthroned

The space is bleeding, with the hate from the race of  
Memes

Universal prototypes, an open door to infinity  
Insected with corpses, the apostolic wrath  
Ethereal crossing, chaos enthroned

Cyclones and storms  
The last days of humanity  
This corrosion in perfect design  
To zero and one

The action, reaction, dementia like a maze  
Creation, corruption, the universe in haze  
The balance, imbalance, the edge of obscure realms  
A zero, subhero, the life of human breed

Chaos enthroned
