I am your heroin  
That controls the eruption of Gods  
Descending the spheres of thousand (black) aeons  
An equal gravity of worms...  
A fortune of Cosmos  
A fragile dream...

Putrescence at levels, the Age of distant zones  
An architect of marionettes... diabolical spawns  
Reforming all the characters of the "gentle" mankind  
Extremity with sequence by nature's side

I am your scars  
Of the failing unity  
A symmetry of numbers, an empty code  
An equal gravity of worms  
The only eternity

A filthy steroid entwine the truth and false

Annihilated codes with artificial rules  
Incarnating the virus of generative wombs  
A sun that regulates the organical soils  
Confusing all the energies of a visual choice

I am the Virus of human's purity  
I am the Code of every human sin

Invoking my poison that leads to the other side  
A product of evil corrupting the faith of I  
I am the Virus of human's purity  
I am the Code of every human sin
