Every time you call  
I will come to you  
Every time this life  
Becomes too hard to bear  
Across the breath of evening  
I will walk upon your shore  
Even when the light has gone...

I will bring a sweet love across  
The night to you  
A never-ending sense of peace  
Until your life is through  
And your last breath is done...

Every time your love  
Has walked away  
I will be by your side  
Every time your soul weeps  
I will hear your cry...  
Across the earth and oceans

At the dying of the sun  
I will be the one - to come...

I will send a sweet love across  
The night to you  
A never-ending sense of peace  
Until your life is through  
And your last breath is done...

I will always keep you safe from harm  
And ever be within your heart...

I will send a sweet love across  
The night to you  
A never-ending sense of peace  
Until your life is through  
And your last breath is done...

And your last breath is done...
