Oh man just throw sand into my eyes, from beaches of
heaven under the skies, to restore my face and
recharge my mind, take me away for a fantasy find

Come on man throw some sand into my eyes, from the
beaches of heaven under baby blue skies,
Come on man throw some sand into my eyes,
Sleepdreamer

I want to fall asleep and sleep off all, the horse was
beaten by adderall, held hostage by hollywood as
useless as lying , the body is a machine with dreams
that are worth trying,
Come on man throw some sand into my eyes, from the
beaches of heaven under baby blue skies,
Come on man throw some sand into my eyes,
Sleepdreamer

The dramamine's ignoring and the routine is so boring
(in sleep easy mode my self thoughts are whoring)
