One single door that crashes
One single strobe of light
Upon the velvet sideboard
Upon the silver dye
Hold on to certain values
Hold on to life itself
Remain the lord of death
As one with your soul

See now it's coming near
See now the vision's clear
For once you were afraid
For now there is no fear
Step down and meet the one
Come over to the sun

Farewell my god
Farewell my son

Forever we are
Not made to be here
Forever we try
Embracing eternity

So selfish we are
So cold
The dream
Begins again
Once more

Losing the vibe
Forever we are
Killing the time
Not made to be here
Removing the heart
Forever we try
The curse of the mind
Embracing eternity
