Oh oh oh oh oh oh  
Time to do another  
Oh oh oh oh oh oh  
Time to do another

You lingered by my side and always was in pain  
And it's time to do another  
Even though I knew you, I ignored it and turned away like a habit  
Because I used to say that time will make you forget

After the star disappeared, now I finally know  
I think I know the pain you felt  
Finally, finally  
I can feel everything that you felt  
Now I can feel that heart

Your turned back seemed like there was so sadness  
And it's time to do another  
With a cold voice, you said it as if it was natural  
Like that, we separated again  
Because I always believed it would be okay

After the star disappeared, now I finally know  
I think I know the pain you felt  
Finally, finally  
I can feel everything that you felt  
Now I can feel that heart

I knew after the darkness came  
Because of that small star  
The world had shone  
It would be better if I didn't know  
Because I can't go back anyway  
Please hold onto me for being like this

After you were gone  
I finally look for you with regret  
Now, finally, finally  
I think I can feel your pain

Finally, finally  
I can feel everything that you felt  
Now I can feel that heart
