

## After The Fire "Starflight"

Visit "[Starflight](#)" on MotoLyrics.com

Looking up I close my eyes and suddenly I'm in the air  
Faster and faster still I rise, burning through the  
atmosphere  
I turn and look back as I go and see the world fall far  
behind  
Is this real I just don't know  
With you I'm lost in space and time  
Past the planets and the sun, soaring into deepest  
space  
A million stars blurr into one, as thro' the galaxies we  
race  
Colours start to form and glow, explode like visions in  
my mind  
Is this real I just don't know  
With you I'm lost in space and time
