

## After The Fire "Time To Think"

Visit "[Time To Think](#)" on MotoLyrics.com

So many things I don't understand  
So many things that I need to know  
My life's not working out the way they planned  
Is there some other way I ought to go  
I need some time to think  
I need some time to think  
I'm just a student on the on the path of life  
I'm just somebody seeking out the truth  
I only wanna know what's wrong or right  
Don't put me down just cause I am a youth  
I need some time to think - I need some time  
I need some time to let my brain cool down  
I need some time to think - I need some time  
I need some time to let my brain cool down

My teachers told me what I need to know  
They shoved so many things right on my plate  
They said eat it if I wanna grow  
I'd like a little time to cogitate  
I need some time to think - I need some time  
I need some time to let my brain cool down  
I need some time to think - I need some time  
I need some time to let my brain cool down

Feel like a ship in a bottle, I'm frightened that I'll get  
lost  
I need somebody to help me make it across  
Feel like a tune with no beat, somebody help me  
Take away this cross, won't you let me be free  
I need some time to think - I need some time  
I need some time to let my brain cool down  
I need some time to think - I need some time  
I need some time to let my brain cool down

So many things I don't understand  
So many things that I need to know  
My life's not working out the way they planned  
Is there some other way I ought to go  
I need some time to think  
I need some time to think
