On this coldest of January nights
We drive out past the runway and watch the planes go
flying by
The runway lights are the deepest blue like the colors
of your eyes
So close them tight and kiss me one last time

If you could go anywhere right now
Where would you go?
And would you miss me when you get there?
There's no place that I would rather be
Please don't let me go falling from the sky
The "fasten seatbelt" sign just needs to go out
If only you could be right here by my side
Home wouldn't seem so far from here

Passport, customs, carry on, remember
To shut off all of your electronic devices

Fell asleep on Tuesday woke up Monday afternoon
I slept right through your International Date Line

If you could go anywhere right now
Where would you go?
And would you miss me when you get there?
There's no place that I would rather be
Please don't let me go falling from the sky
The "fasten seatbelt" sign just needs to go out
If only you could be right here by my side
Home wouldn't seem so far from here

Please don't let me go falling from the sky
The "fasten seatbelt" sign just needs to go out
If only you could be right here by my side
Home wouldn't seem so far from here
